

Optical Ground Wire Cable (OPGW)

Standards

ITU-T G.655 singlemode optical fibers
EIA/TIA 598B optical fiber color code
IEEE1138-2009 testing performance for OPGW for use with power lines
IEC 60794 aerial optical cables for OPGW
IEC 61232 aluminum clad steel wire for electrical purposes

IEC 61232 aluminum clad steel wire for electrical purposes IEC 60104 aluminum magnesium silicon alloy wire for overhead conductors IEC 61089 round wire concentric lay overhead electrical stranded conductors

Description

- Optical Ground Wire Cable (OPGW) for installation with overhead power lines
- Contains optical fiber for data and telecom transmission
- Assures performance and durability
- Stainless tube provides optimum protection to optical fiber
- Stainless tube fiber unit is placed in eccentric position and stranded together with aluminum clad and alloy steel wires simultaneously
- High reliability and long lasting aluminum clad steel wire in the inner layer
- Optimum stranding design makes available secondary fiber in excess length
- Good flexure and crush resistance
- High mechanical strength and large short circuit current capacity
